Profile

I stand out for my ability to find creative solutions, design personalized experiences tailored to each need, and constantly learn from my colleagues and industry experts. I specialize in front-end development and enjoy taking on new challenges that allow me to continue growing professionally.

Professional Experience

Front End Developer   05/2025 – present
BissTrack Software   San Juan, Argentina
  Responsible for developing new views and creating functional, reusable
  components in SPA environments. Integrated REST API services and
  implemented authentication using JWT. Used Git for version control
  and collaborative workflows.

Education

Bachelor's Degree in Systems   08/2025 – Present
Universidad Argentina de la Empresa   Buenos Aires,
                                                                          Argentina

Advanced Technician in Web Design and Programming   2023 – 02/2025
Instituto Leonardo Da Vinci A-1331   Buenos Aires,
                                                                          Argentina

Bachelor of Computer Science   2018 – 2022
Casa Salesiana Pio IX   Buenos Aires,
                                                                          Argentina

ESCUELA SUPERIOR DE ARTE MULTIMEDIAL Instituto Leonardo Da Vinci
A-1331

Projects

Social network TVON   09/2024 – 02/2025
- Social network focused on a TV audience.
- Development in Inertia.js.
- Technologies used: Vue.js, Laravel, Firebase, and Tailwind.
- Design patterns used: MVC and Singleton.
- Consumes an API.

- Uses Firestore as the main database and Firebase Storage for image and video storage.
- Authentication via Firebase Authentication and custom middleware in Laravel.

API REST CRUD   09/2024 – 12/2025
- Developed using a MERN stack (MongoDB, Express, React, Node.js).
- Authentication via JWT.
- Creation and consumption of REST APIs.

To Do List Application
- Developed in Expo.
- Technologies used: React Native, TailwindCss, Appwrite.
- CRUD notes.
- Authentication and registration using Appwrite.

E-commerce design
- Designed with Adobe Illustrator and prototyped with Figma.
- Beauty e-commerce designed from the ground up with my client's needs in mind. It includes a home page, product page, product mockup, cart window, and checkout window.
